Did you know...

If you're not sure if a label is direct thermal or thermal transfer, try the "scratch test." First, lay the label on a hard surface such as a desktop. Next, run your fingernail or a pen cap quickly back and forth across the label. If it turns black, it's a direct thermal label. If not, it's a thermal transfer label.

Imprinted Thermal Labels

Pricing includes labels specified plus one standard color on 3" core, 8" OD.
